

Receipt Capture

Digitally Capture Receipts and Signatures

Technology is changing rapidly, with new ideas entering the field every day. How do you keep a competitive edge?

It's time to go paperless! Millennial Vision's Receipt Capture System gives you the power to reduce overhead expenses, improve security and increase profitability. All with a compliant, easy to use system that enables you to serve your customers better than ever and make time for new ones.

- Easily integrates with most core data processing systems
- Captures Receipts, Signatures, Checks and other deposit documents at time of transaction
- Auto Indexing of all captured deposit documents
- Cash in and out teller balancing tool integrated with receipt
- Auto account number masking for added security
- Biometric fingerprint capture capability
- Instant access to stored receipts by account number, teller ID and date.
- Significantly reduces pre-printed paper expense and paper storage
- Complete integration with our Check 21 Teller Capture solution

Product Specifications

How the Receipt Capture System Works

When a receipt is generated from an online transaction screen, RCS captures the print stream sent from the host computer and creates an image which is stored in your PC's memory.

A signal is then sent to the signature pad requesting the customer to sign their name on the pad.

Once this is accomplished, the operator has the option to image the captured signature and receipt directly into the imaging server, generate a paper receipt using their normal transaction printer or create a thermal receipt with the customer's signature using MVi's thermal printing option.

Upon completion of the transaction, the receipt is automatically archived along with the customer's electronic signature and stored for historical purposes.

Flexibility

RCS is compatible with most core data processing systems and can be deployed across most LAN and WAN environments.

MVi will provide the necessary training and installation resources to insure a smooth implementation within your organization.

Pentium is a registered trademark of Intel Corporation

Windows is a registered trademark of Microsoft Corporation

Benefits to the Financial Institution:

- Reduction in paper transaction costs
- Improved customer service
- Quieter environment with optional thermal printer
- Reduction in scanned items
- Improved transaction lookup for archived receipts
- Reduction in Fraudulent Transactions

Benefits to customer:

- Less time at teller line
- Quicker research capabilities
- Improved Security
- Historical record look-up

Minimum System Requirements

Intel Based PC

Pentium IV computer *

2GHz or faster processor

1GB RAM (Win XP)

80GB Free Hard Drive Capacity

USB 2.0 compliant adapter

Microsoft Internet Browser 5.x or newer

Minimum Operating System requirements:

Windows XP Professional (Preferred)
