

# Report Capture

## Auto Capture Reports in PDF Format

MVi's Report Management program is a highly scalable Enterprise Report Management tool that provides a powerful solution for storage and retrieval of electronic report documents.

Report Capture can be integrated with most popular Core Data Processing Systems and will process reports into a PDF format for efficient storage.

Report Capture auto indexes the reports and stores them in the Laserfiche Document Management system where they can be retrieved using indexes or OCR searches.

- Easily integrates with most core data processing systems
- Auto Captures Reports and stores them in PDF format
- Auto Indexes captured reports and stores them in Laserfiche Document Management system
- Member statements stored as PDF's and are compatible with most home banking programs
- Instant access to stored reports by report name, creation date and group
- Significantly reduces paper expense, research time and paper storage
- Complete integration with other documents stored in Laserfiche repository
- Can be used with third party programs that generate ASCII text reports

# Product Specifications

## Integration Options

- Compatible with most Unix and Windows based systems
- Store reports on MS Windows dedicated server
- Accepts reports from multiple sources

## Report Capability

- Process immediately or by defined schedule
- Supports multiple text formats
- Stores unrecognized reports until processed
- Document Import/Export
- Archive Windows and Unix based reports
- Uses PDF/A Format for large files
- Auto index based on pre-defined criteria

## Folder and Report File Features

- Intuitive folder structure makes searches easy
- Supports Folders within Folders report organization
- **General Features**
- Use sticky notes to annotate report documents
- Image overlay allows for different report formats
- Universally Accepted format.

## Benefits to the Financial Institution:

- Reduction in paper transaction costs
- Improved customer service
- Quieter environment
- Reduction in scanned items
- Improved lookup for archived reports
- Reduction in Fraudulent Transactions

## Benefits to customer:

- Quicker research capabilities
- Improved Security
- Historical record look-up
- Integrated statements with other imaged member data

## Minimum System Requirements

Intel Based PC

Pentium IV computer \*

2GHz or faster processor

1GB RAM (Win XP)

80GB Free Hard Drive Capacity

USB 2.0 compliant adapter

Microsoft Internet Browser 5.X or newer

Minimum Operating System requirements:

Windows 2003 Server host.
